

Notice of Fire Department Training

From May 13-16, 2014 your Seattle Fire Department will be conducting "live fire" training exercises at

6556 32 Av. NE

This training is being conducted for the newest members of the Seattle Fire Department who are in their last weeks of initial training. There will be smoke that may be present in the neighborhood for periods of time throughout the aforementioned dates. The smoke being produced is a by-product of clean untreated wood. At no time will any plastics or other man made materials be used to create the live fire environment. This training is being conducted per the Puget Sound Clean Air Agency rules and regulations.

This type of realistic training on existing structures that are scheduled for demolition better prepares Seattle Firefighters to protect you and your community.

Thank you in advance for your cooperation.

Questions can be directed to Captain Brian Maier,
Recruit Coordinator, Seattle Fire Department Training Div. at
